

# Advanced Real-time Analytics

Oracle Stream Analytics allows users to process and analyze large scale real-time information by using sophisticated correlation patterns, enrichment, AI and Machine Learning. It offers real-time actionable business insight into streaming data and automates action to drive today's agile businesses. It can be used to identify both **business threats** and **opportunities** leading to immediate impacts on business outcomes.

Thanks to Oracle Stream Analytics enterprise organisations can

- Autonomously interact with clients in real - time
- Present tailored communication to customers with the right content at the right time
- Create unique customer experiences based on real- time insights into client behaviour
- Reclaim client transactions from competitors
- Enable clients to instantly apply for new products and activate additional services
- Enhance interactions with machine learning and AI

## Use cases

- **Financial Services:** performing real-time risk analysis, monitoring and reporting of financial securities
- **Telecommunications:** ability to perform real-time call detail (CDR) record monitoring and distributed denial of service attack detection
- **IT Systems:** security risks detection, monitoring failures and performance bottlenecks in applications or servers
- **Insurance:** ability to learn and to detect potentially fraudulent claims
- **Real-time marketing** – creating advertisement and offers tailored to client
- **Supply Chain and Logistics** – tracking shipments in real-time, delays detection, stocking levels control
- **Transportation:** ability to create passenger alerts and detect baggage location
- **Public Sector/Military:** detect dispersed geographical enemy information, ability to alert about an emergency

Goldenore has over a decade of unique experience in real data integration. As an Oracle Strategic Partner, we work closely with Oracle product teams to ensure the highest quality of implemented solutions and delivered services. Our team of professionals has unique expertise, proven through Oracle certifications and customer references.
