Driving Data Agility: How Polish Bank Transformed Reporting with Real-Time Analytics

Customer

Our customer is a leading bank in Poland.

Business challenge

The customer aimed to enhance their reporting process by efficiently managing the large volumes of data that were overloading their BI system and causing delays in generating reports. Their goal was to expedite decision-making by leveraging real-time Business Intelligence capabilities, consolidating data from multiple databases into a single repository for comprehensive reporting, and ensuring minimal delays in data delivery with full data consistency in the reporting database.

Solution

The analytics workload was shifted to Oracle GoldenGate to alleviate the strain on the BI system. By implementing GoldenGate's many-to-one style replication, minimal second latency was ensured. Key steps included:

- Modifying the database model for improved efficiency.
- Implementing transformations to facilitate accurate and timely reporting.
- Utilizing Oracle Analytics Publisher connected to the new consolidated database for seamless reporting, integrating data from multiple systems.

Results

- Reporting process optimised due to real-time insights with enhanced data consistency and minimal delays.
- Real-time BI reports available for informed decision making.
- Reporting speed increased significantly due to real-time analytics.
- BI System offloaded.
- Real-time data accessible for reporting purposes.

What our clients say about us:

The Goldenore team stepped in and delivered a solution of great value to Paysafe. Their approach is very professional, and they have delivered outstanding results.

Aleksander Stankov,
VP IT Production Operations, Digital Wallet and Shared Services, Paysafe.

Goldenore always tries to fulfill the entrusted tasks and are open to possible changes in priorities during the project. In critical moments, Goldenore dedicates additional resources to meet the project schedule.

Tomasz Kędziora,
IT Infrastructure & Security Director at PLAY, the largest mobile network in Poland.
