

The Evolution of Insurance Data Management: The Client on the Path to Real-Time Reporting and Optimized Data Access

Customer

Our client is a key institution in the insurance sector.

Business challenge

Processing vast volumes of transactions related to insured vehicles, the client required real-time access to insurance policy information for the vast majority of vehicles registered in Poland, as well as the ability to share this data with authorized parties.

An additional challenge was the integration and reporting of data sourced from multiple systems. Choosing Goldenore enabled the implementation of solutions that facilitated real-time reporting and efficient data management.

Solution

- Delivery of advanced infrastructure based on Oracle Exadata and Oracle ZFS
- Preparation of an environment for the implementation and maintenance of data warehouse replication using Oracle GoldenGate
- Implementation and maintenance of data replication mechanisms between databases with advanced transformations
- Provision of GoldenGate and Oracle Database Enterprise Edition licenses, along with database options and one year of technical support.

Results

- Real-time transfer of data for clients insuring vehicles
- Complete and up-to-date information on motor insurance policyholders made available online to insurance companies
- Real-time data delivery to the Central Data Warehouse
- Streamlining multiple databases and schemas into a unified repository
- Offloading operational databases from the report generation process
- Elimination of information silos through seamless integration of data from various sources while ensuring regulatory compliance

What our clients say about us:

“The Goldenore team stepped in and delivered a solution of great value to Paysafe. Their approach is very professional, and they have delivered outstanding results.”

Aleksander Stankov,
VP IT Production Operations, Digital Wallet and Shared Services, Paysafe.

“Goldenore always tries to fulfill the entrusted tasks and are open to possible changes in priorities during the project. In critical moments, Goldenore dedicates additional resources to meet the project schedule.”

Tomasz Kędziora,
IT Infrastructure & Security Director at PLAY, the largest mobile network in Poland.
